There are those among us who are actively attempting a complete takeover of humanity in order to set themselves up as supreme beings through Transhumanism.

Transhumanism: Genetic Engineering of Man – the New

Genetic engineering is the direct manipulation of an organism's genome using certain biotechnology techniques that have only existed since the 1970s. Human directed genetic manipulation was occurring much earlier, beginning with the domestication of plants and animals through artificial selection.

History of genetic engineering - Wikipedia

A new gene can be inserted into a loop of bacterial DNA called a plasmid. This is done by cutting the plasmid DNA with a restriction enzyme, which allows a new piece of DNA to be inserted. The ends of the new piece of DNA are stitched together by an enzyme called DNA ligase. The genetically

In order to replicate, viruses introduce their genetic material into the host cell, tricking the host's cellular machinery into using it as blueprints for viral proteins.

article highlights. Genetic engineering focuses on: isolating genes, modifying genes so they can be transferred into and function within a new organism of a different species (transgenics) or the same species (cisgenics),

Genetic programming (GP) is an automated method for creating a working computer program from a high-level problem statement of a problem. Genetic programming starts from a high-level statement of "what needs to be done" and automatically creates a computer program to solve the problem.
